Thursday Plant Tour Options

Delegates will have the opportunity to join one of the following plant tours. Please note your choice on the first page of this registration form.

GreenField Ethanol

Vareennes, Québec

GreenField Ethanol of Quebec Inc. is an ICM-designed plant, completed in early 2007, that produces fuel-grade ethanol, carbon dioxide, distillers' dried grains, and MWDGS. Current capacity is 160 million liters (around 42 million US gallons) of fuel-grade ethanol per year, made from 15 million bushels of Québec corn. In 2008 GreenField Ethanol completed a second ICM-designed plant in Johnstown, Ontario, that produces 200 million liters of fuel-grade ethanol.

Diageo Global Supply

Salaberry-de-Valleyfield, Québec

The original building dates from 1909 and became a distillery in 1938, producing alcohol for military purposes. It became a whisky distillery in 1945 with the first whisky, Golden Wedding, being produced. During the fifties, new products such as Schenley OFC, Ron Carioca Rum, and Troika Premium Vodka came online. The sixties saw the construction of additional warehouses for aging and the addition of a grain dryer. On October 22, 1969, the one-millionth barrel was produced, followed by the second millionth in 1986. Today, the plant continues to produce world-renowned brands such as Smirnoff vodka, Captain Morgan rums, Gordon's London Dry gin, and VO Canadian whisky. In 2009 the plant was acquired by Diageo, the largest spirits manufacturer in the world, and produces 3.4 million cases of beverage alcohol annually.

Lallemand's Préfontaine Yeast Plant

Montréal, Québec

Lallemand was founded in Montréal at the end of the 19th century by a young immigrant from the Alsace region of France, Fred "Lallemand." The plant on Préfontaine Street was built in 1915, with production of baker's yeast starting there in 1923. Roland Chagnon acquired the business in 1952 and set it on a path of expansion. The Chagnon family remains the current owner. Today, the plant produces a range of liquid, cake, and dry yeasts for the fuel ethanol, beverage alcohol, and baking industries.
